Mr. Mark Dziadosz,

SUBJECT: Response to PTI SC 1.8 - visible emissions test on portable crusher

This email is in response to the visible emissions test requirements outlined in PTI Special Condition 1.8, which mandates opacity testing and report submittal for all NSPS-subject crushers, screeners, and conveyors associated with Ahern Contracting, Inc.

We are writing to inform the Air Quality Division (AQD) that my visual certification has expired, and I am currently scheduling EPA Method 9 certification, which will be completed within the next 30 days from the date of sending this email. Immediately after this certification, we will conduct the required opacity observations on all subject equipment under Ahern Contracting, Inc. In strict compliance with SC1.8. We will compile and submit a complete report detailing these opacity observations to the AQD within 30 days after the final date of the test evaluation.

Ahern Contracting, Inc. is a small, family-owned industrial manufacturing facility. We crush only about 20 days per year and process an estimated maximum of 3,000 tons annually. Given these limited operating windows, our testing schedule depends heavily on our brief active production periods. I will ensure the testing is performed during our next operational cycle shortly after certification is secured.

Thank you for your understanding as I ensure we maintain the proper certification credentials to execute this performance test accurately. If you have any questions, please contact James Ahern at (810) 343-0403 or email Aherncontracting@yahoo.com.

Thank you,

James Ahern
President
